

Outdoor Wireless Contact Sensor

2GIG-DW30-345

The 2GIG Outdoor Wireless Contact Sensor expands the reach of security systems to outdoor areas, providing timely notification when outdoor gates or doors are opened. Able to handle harsh temperature conditions, this sensor is ideal for wide gaps when a typical contact sensor is insufficient.

Rare Earth Magnet

Weatherproof Transmitter

Key Selling points:

- Sensor enables a wide gap (2 inch) enabling sensing for applications from yard gates, and swimming pool access to detached garages.
- Designed for extreme weather conditions (IP56). (-40° to 150° F)

Key Features:

- Sends a notification to the alarm panel when a door, gate or window is opened or closed.
- Enables two unique zones. One is for an internal magnetic reed switch while the second is for a normally-closed circuit that can have external devices wired to it.
- Can be painted to match its mounting surface.

2GIG OUTDOOR WIRELESS CONTACT SENSOR SPECIFICATIONS & TECHNOLOGY

OUTDOOR WIRELESS CONTACT SENSOR SPECIFICATIONS

Ordering Part Number	2GIG-DW30-345
Wireless Signal Range	350 ft (106.7m), open air with Wireless Control Panel
Transmitter Frequency	345 MHz
Compatibility	2GIG
Supervisory Interval	70 minutes
Sensor Dimensions (L x W x H)	4.6 x 2.1 x 1.5 inch (116 x 54 x 39 mm)
Magnet Dimensions (L x W x H)	4.1 x 1.0 x 1.1 inch (103 x 25 x 28 mm)
Magnet Type	Rare Earth
Magnet Gap	Up to 2 in
Material	Paintable ABS
External Input	Accepts N/C dry contact devices
Operating Temperature	-40° to 150°F (-40° to 66°C)
Operating Rel. Humidity	0 to 100%, non-condensing
IP Rating	Tested to IP56
Projected Battery Life	5 years
Warranty	2 years

Notification Sensors by 2GIG

The Outdoor Wireless Contact Sensor is part of the new 2GIG Notification Sensors line, enabling more smart security and control than ever before. These easy-to-install solutions that add multiple unique touch points to the 2GIG system. With this growing line, dealers can install increasingly personalize systems that improve customer satisfaction and retention.

Early Awareness Brings Peace of Mind

The new notification sensors enable homeowners to

be notified earlier in the “event cycle” such as when the stove is left on (before something catches fire) or when a leak is detected (before flooding damage occurs).

Customized Notifications

Select 2GIG sensors can also provide early warnings with an unparalleled level of customized notifications for end-users through our back-end partners, such as alarm.com. End-users can choose to get notifications on their smart phones via back-end partners’ app, or alarms on their compatible security panel.
