Security Sensor with On/Off Switchable Encryption.

2GIG-FT100-345

Flood and Temperature Sensor, Probe Style

The 2GIG® FT100-345 Wireless Flood/Temp Sensor is a fully supervised and tamper protected 345 MHz sensor that will monitor the ambient temperature of a space for high or low temperature thresholds and report if changes outside of the defined settings are detected. It also has the ability to detect and report the presence of standing water in the immediate sensor location. The sensor transmits in non-encrypted mode by default, and can be set to encrypted mode via an on-board switch.

Stock half as many SKUs on trucks.

Easily choose encrypted/non-encrypted operation with an internal switch. 2GIG 345S sensors work for any installation.

Complete 2GIG security ecosystem.

345S sensors work with the all-new GC Touch, revolutionary 2GIG EDGE, and earlier security & control panels from 2GIG.

GC TOUCH

2GIG EDGE

2GIG products are known for quality and field-proven reliability with more than 5 million security panels and 25 million devices deployed that boast a less than 0.03 percent failure rate – the best in the industry.
